Health history

For Elena Brooks

DOB 1961-06-04 | Sex field as supplied: female | Language: English

Prepared by Jordan Brooks (caregiver) | Snapshot 2026-11-15
Not clinically reviewed
Source statements are preserved below. This document records information for review; it is not a set of treatment orders.

Current context

Context: Preparing for a new primary care visit

Description: Patient requests one clear summary of her medicines and prior care. No new symptoms were supplied for this example.

Current status: Appointment preparation; current clinical assessment not supplied.

Sources: s1

Allergies and intolerances

Penicillin - Reaction: Rash | Status: unknown | Patient report; reaction date and clinical review not supplied.
Patient reported | Sources: s1

Medication summary

Amlodipine - 5 mg | By mouth | Once daily | Status: active | As reported 2026-11-15 | Patient reports current use; no clinician reconciliation of this summary.
Patient reported | Sources: s1, s2

Acetaminophen - 500 mg | By mouth | As needed; maximum frequency not supplied | Status: active | As reported 2026-11-15 | Reported use only; this summary does not supply dosing instructions.
Patient reported | Sources: s1

Omeprazole - 20 mg | Once daily | Status: historical | As reported 2024-10-03 | Present on an old prescription; current use has not been confirmed.
Documented in source | Sources: s3

Problems and conditions

Hypertension - Status: active | Listed in the fictional clinic letter.
Documented in source | Sources: s2

Knee osteoarthritis - Status: active | Patient reports ongoing intermittent knee discomfort.
Patient reported | Sources: s1

Procedures

Right knee arthroscopy - 2019 or 2020; year unresolved | History note and patient recall give different years. Original operative report not supplied.
Uncertain | Sources: s1, s4

Results and observations

Blood pressure - 134/82 mmHg | 2026-11-10
Documented in source | Sources: s2

Creatinine - 0.9 mg/dL | 2026-11-10 | No reference interval supplied.
Documented in source | Sources: s2

Event history

Primary care review - 2026-11-10 | Blood pressure and medication list documented in a fictional clinic letter.
Documented in source | Sources: s2

Patient preferences and support

Communication preference - Patient prefers written follow-up instructions and asks that her caregiver be included with her permission.
Patient reported | Sources: s1

Contacts

Sources: s1

Questions to ask

1. Which medicines are currently being taken, including the older omeprazole prescription?
2. Can the penicillin reaction and allergy record be reviewed?
3. Can the operative report confirm the knee procedure year?

Information to check

OPEN: Patient recall gives 2019 for knee arthroscopy; the prior summary gives 2020.
Sources: s1, s4
